BMS Bootcamp Coding Workshop: Pre-Assignment Instructions

During the coding workshop, we will be working with R and the paper "Transcriptome Profile of Human Colorectal Adenomas." Follow the instructions below to set up R and RStudio on your laptop, then bring that laptop with you to class.

1. Install R: https://cran.rstudio.com (choose your operating system under "Download and Install R".
2. Install RStudio: https://www.rstudio.com/products/rstudio/download (choose your operating system under "Installers for Supported Platforms")
3. Open RStudio. Put each of the following lines of code into the console and hit Enter. If it asks any questions along the way, just type "a" for all and hit "yes" on pop-ups.

```
source("http://bioconductor.org/biocLite.R")
biocLite()
install.packages('RColorBrewer')
```
